

# RHIC Status Update

Time Meeting 4/28/15

# Last week of p-p operation

- Continued to struggle with polarization
  - AGS problem is still unclear
  - Limited improvement in blue polarization decay from changes in rotator current

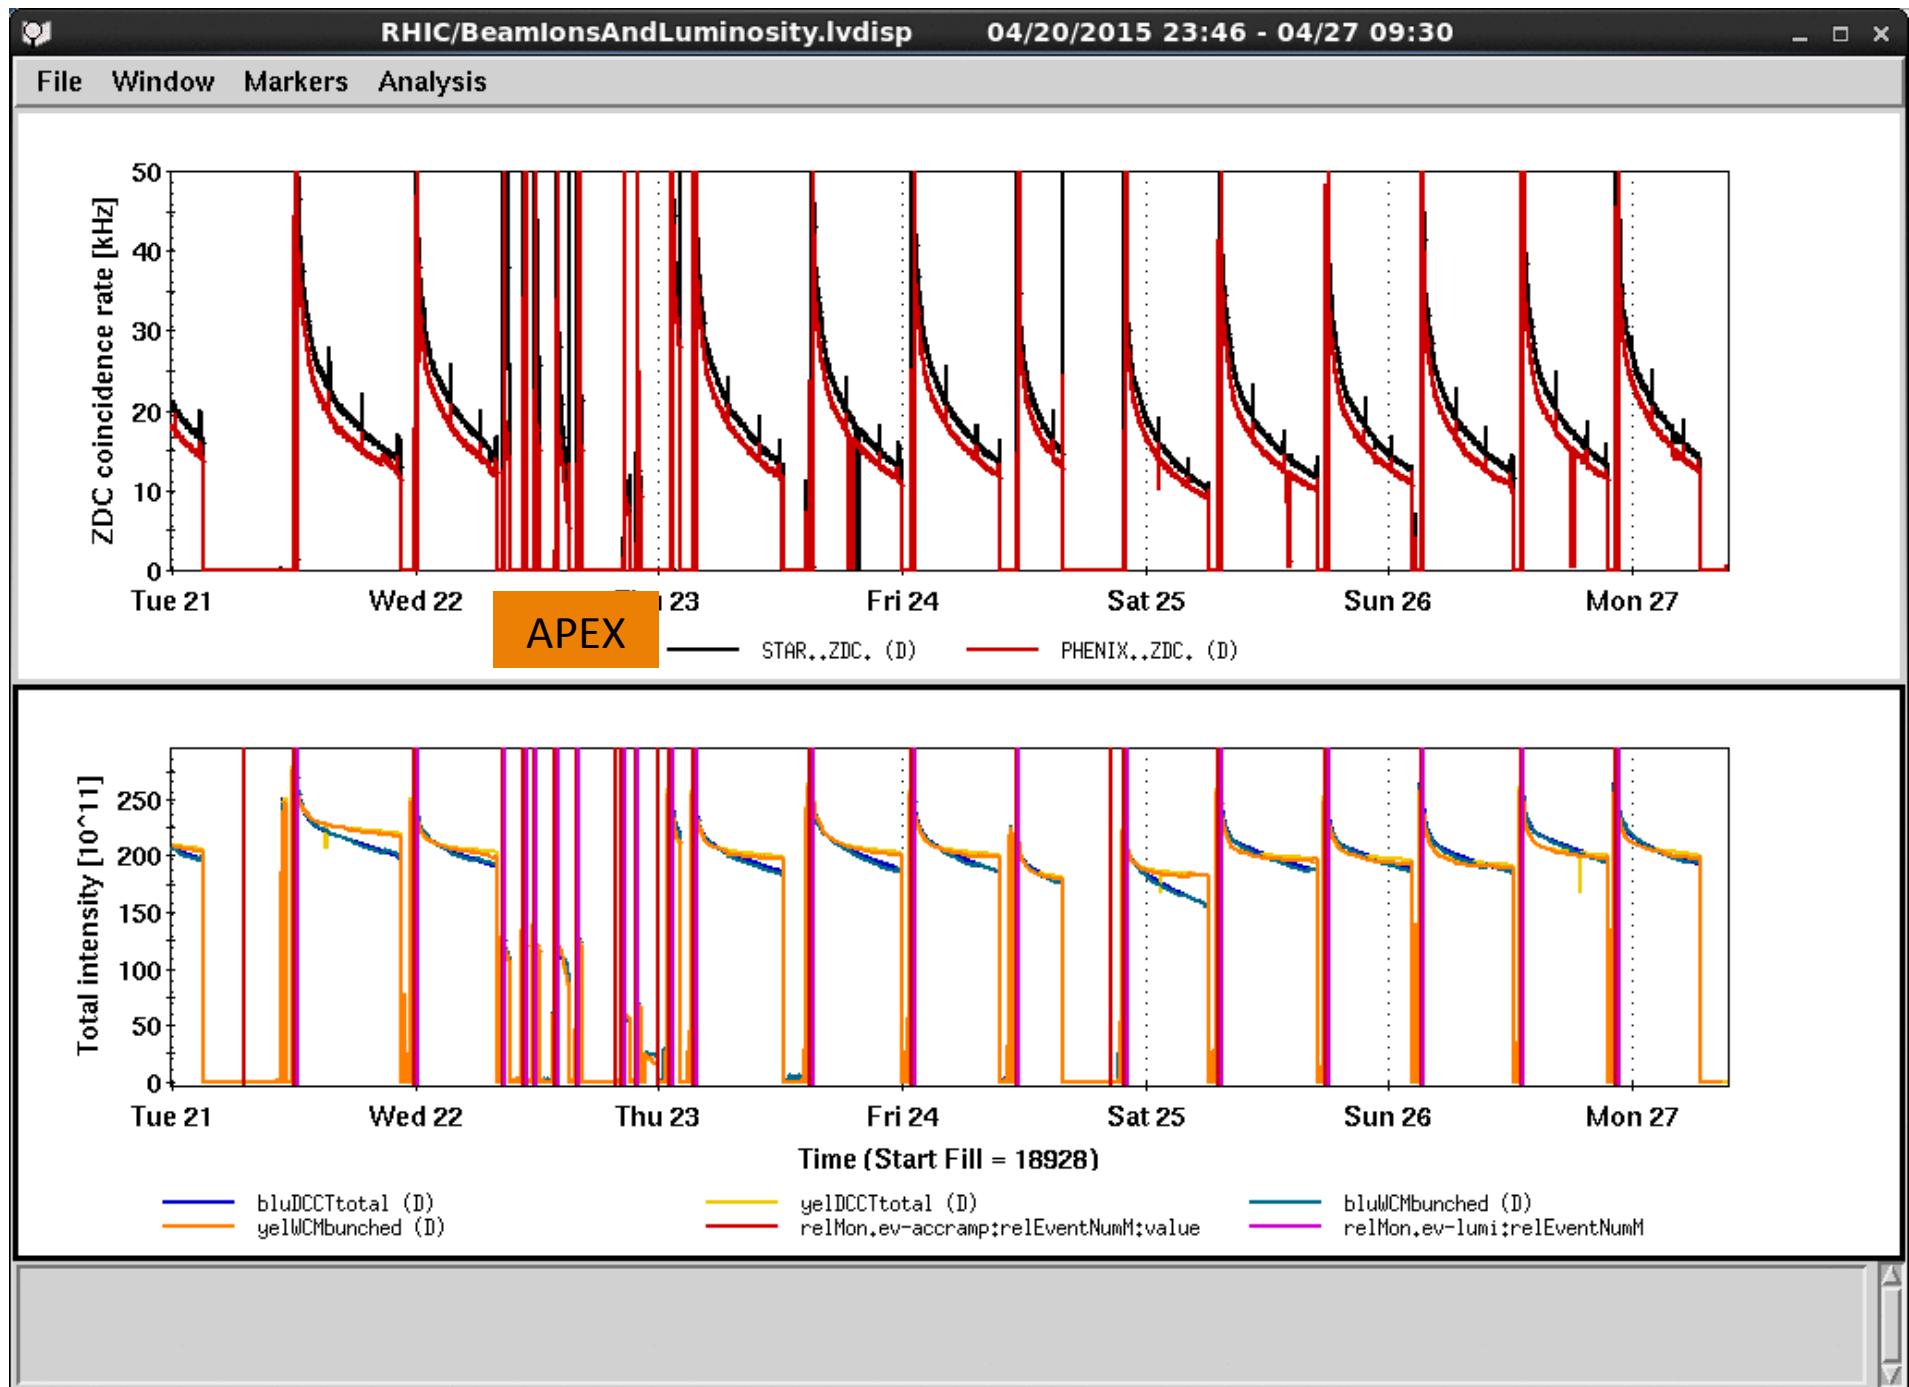

Figure 1

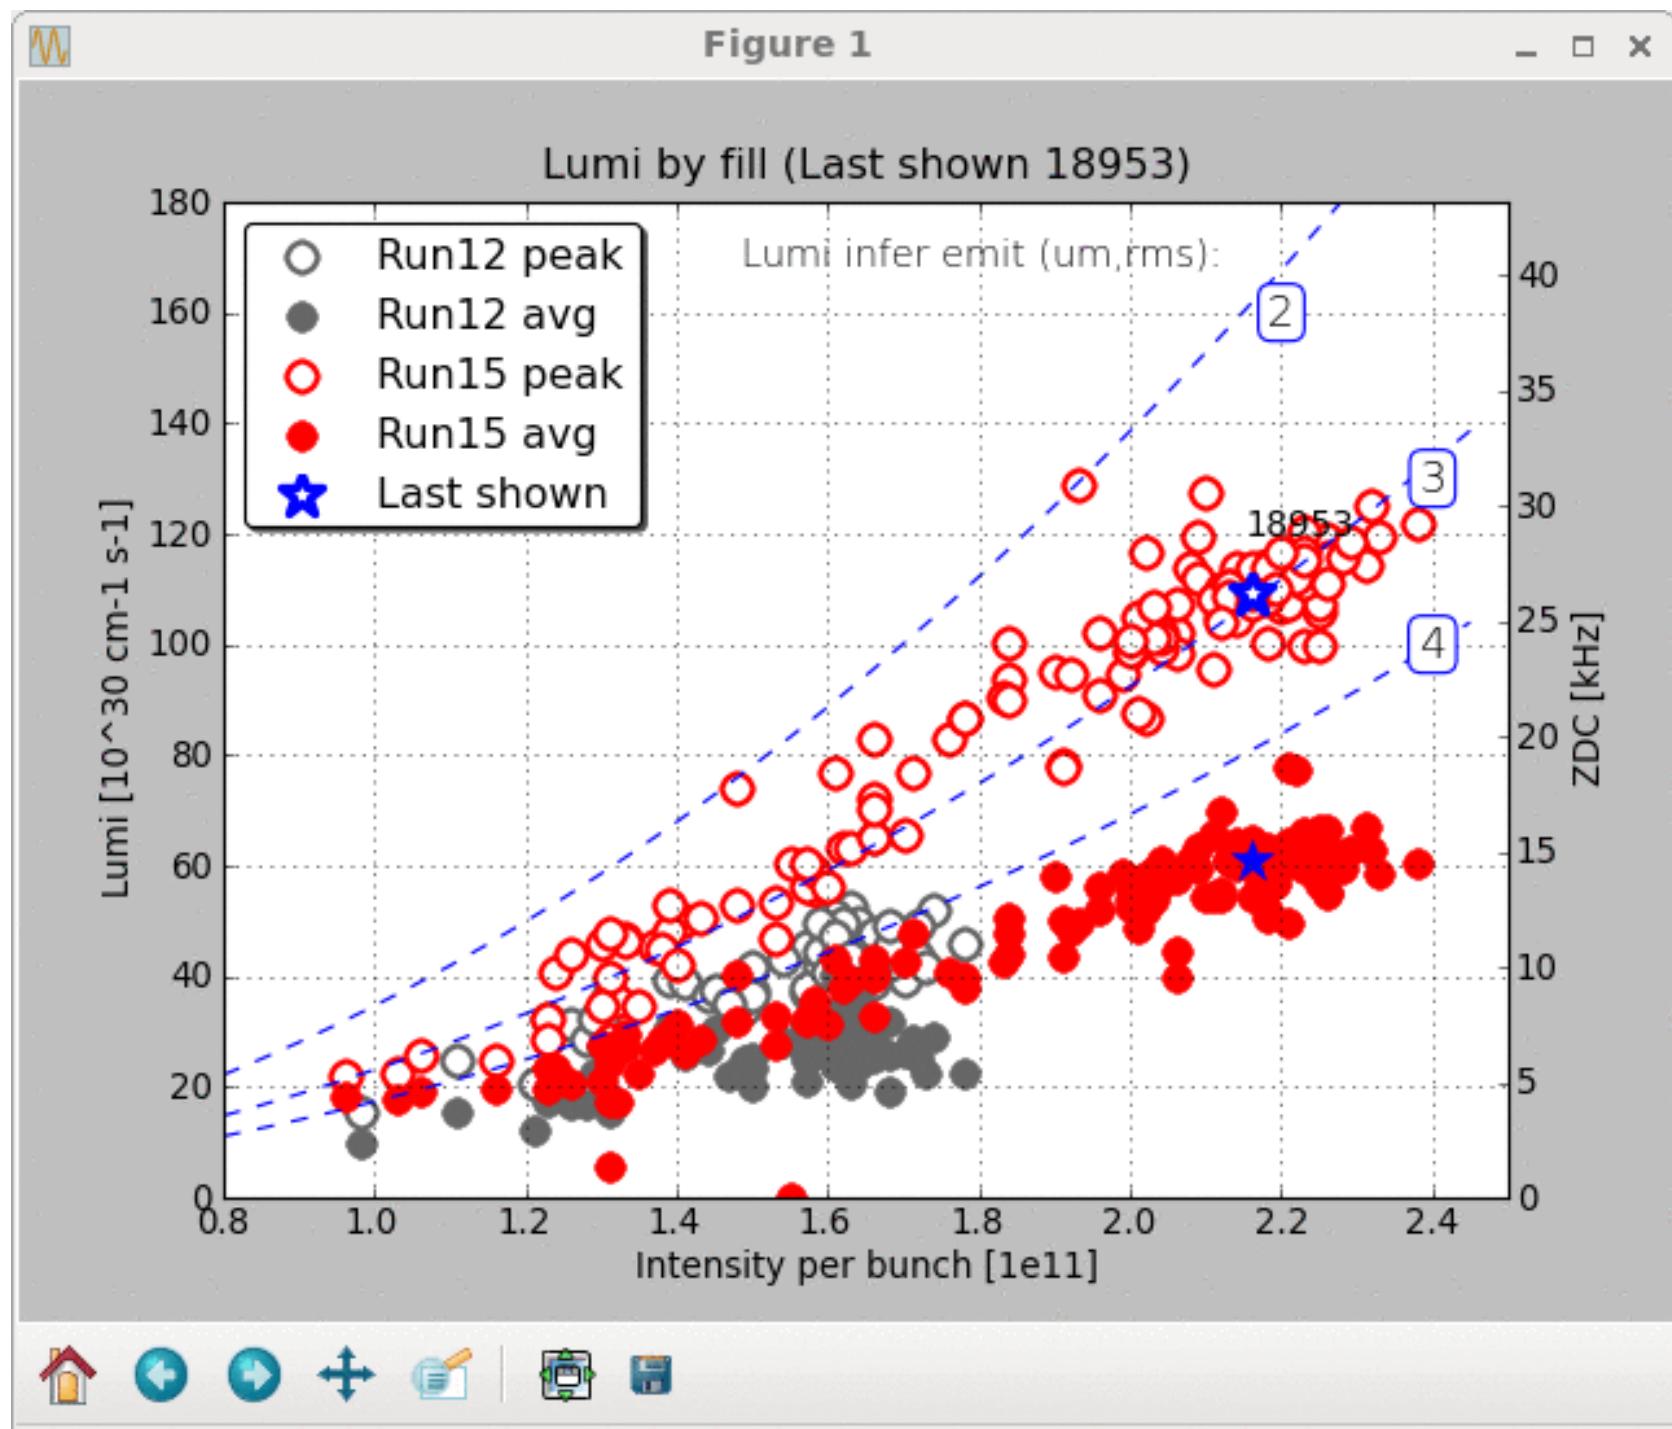

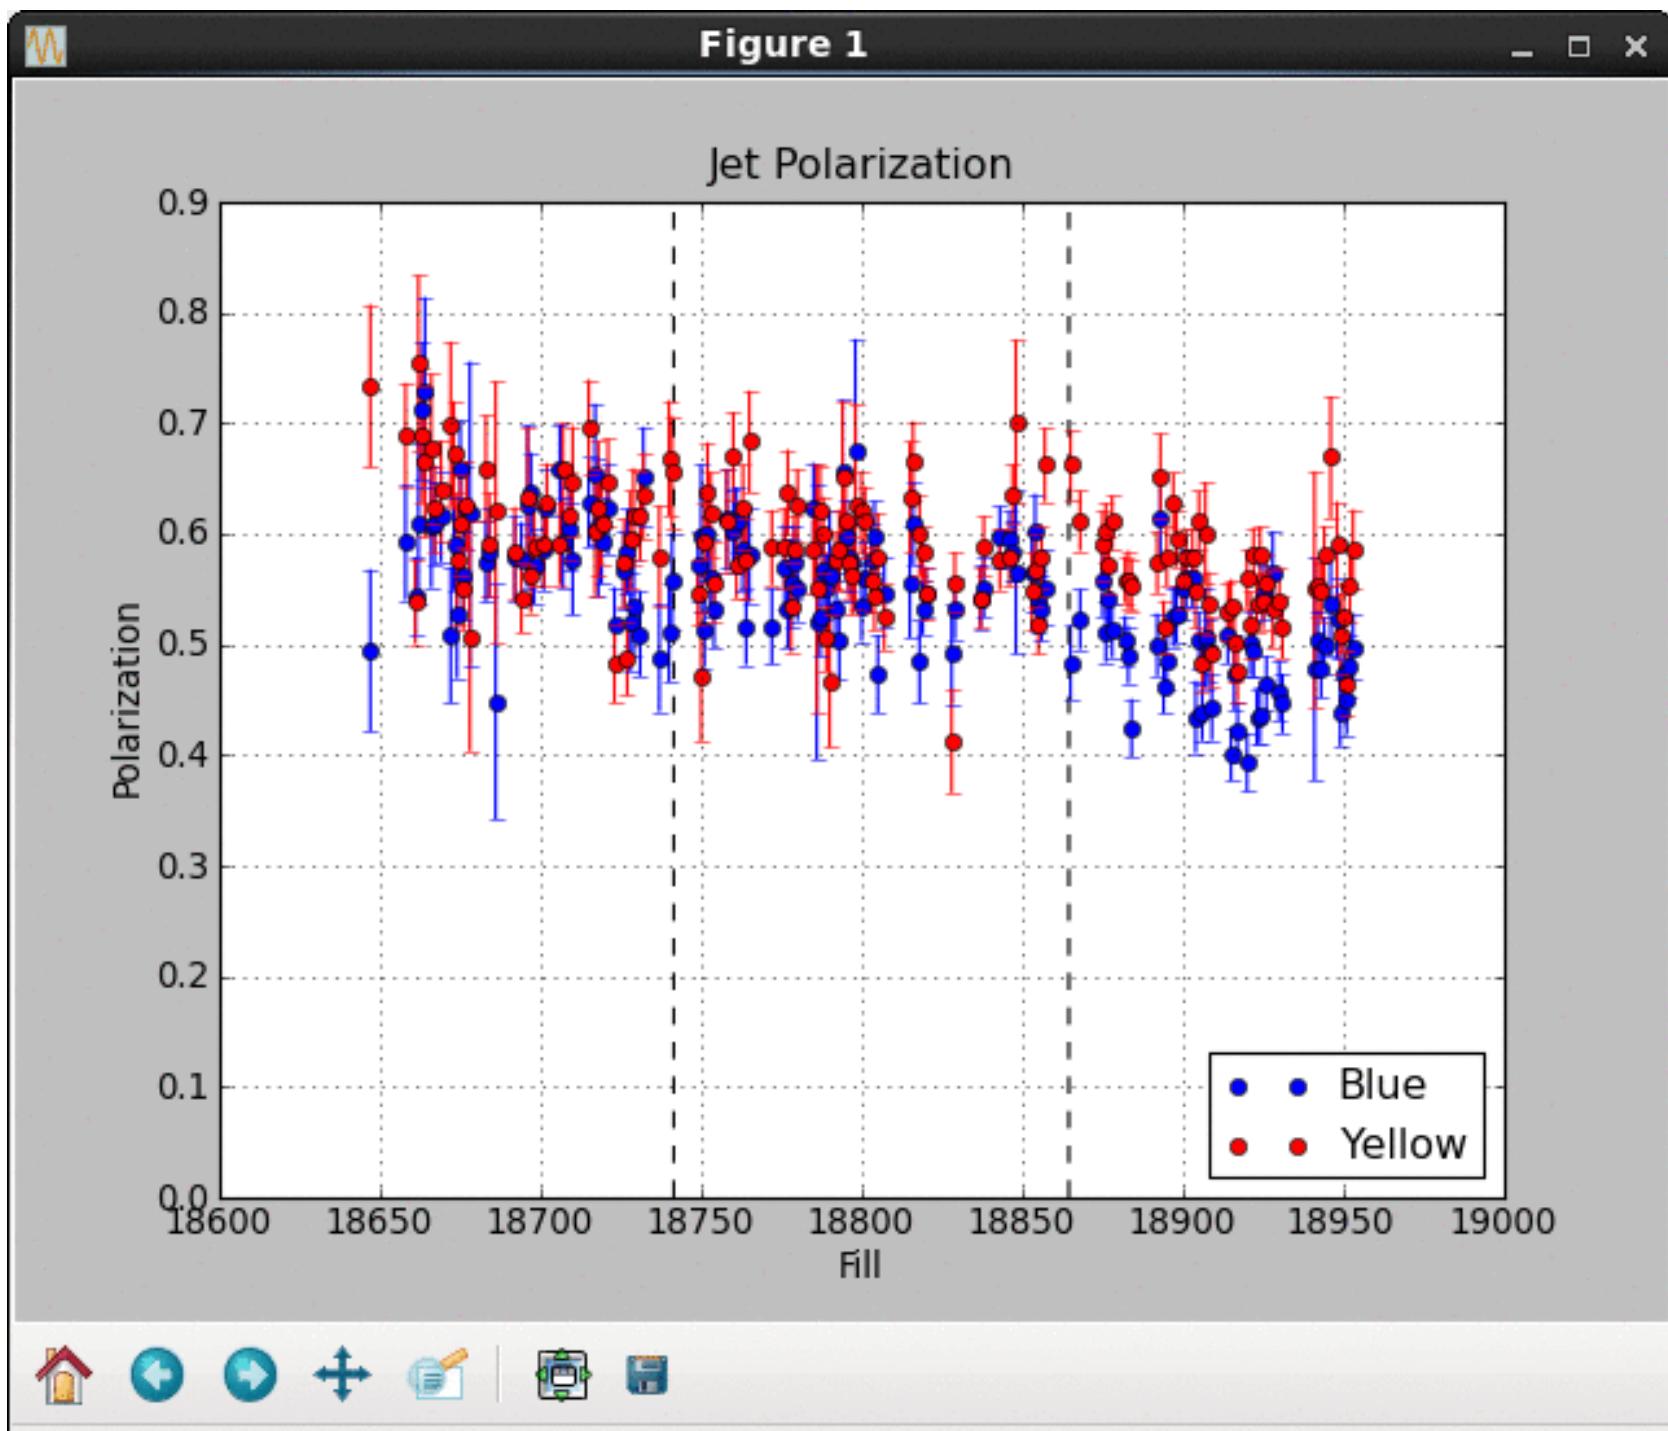

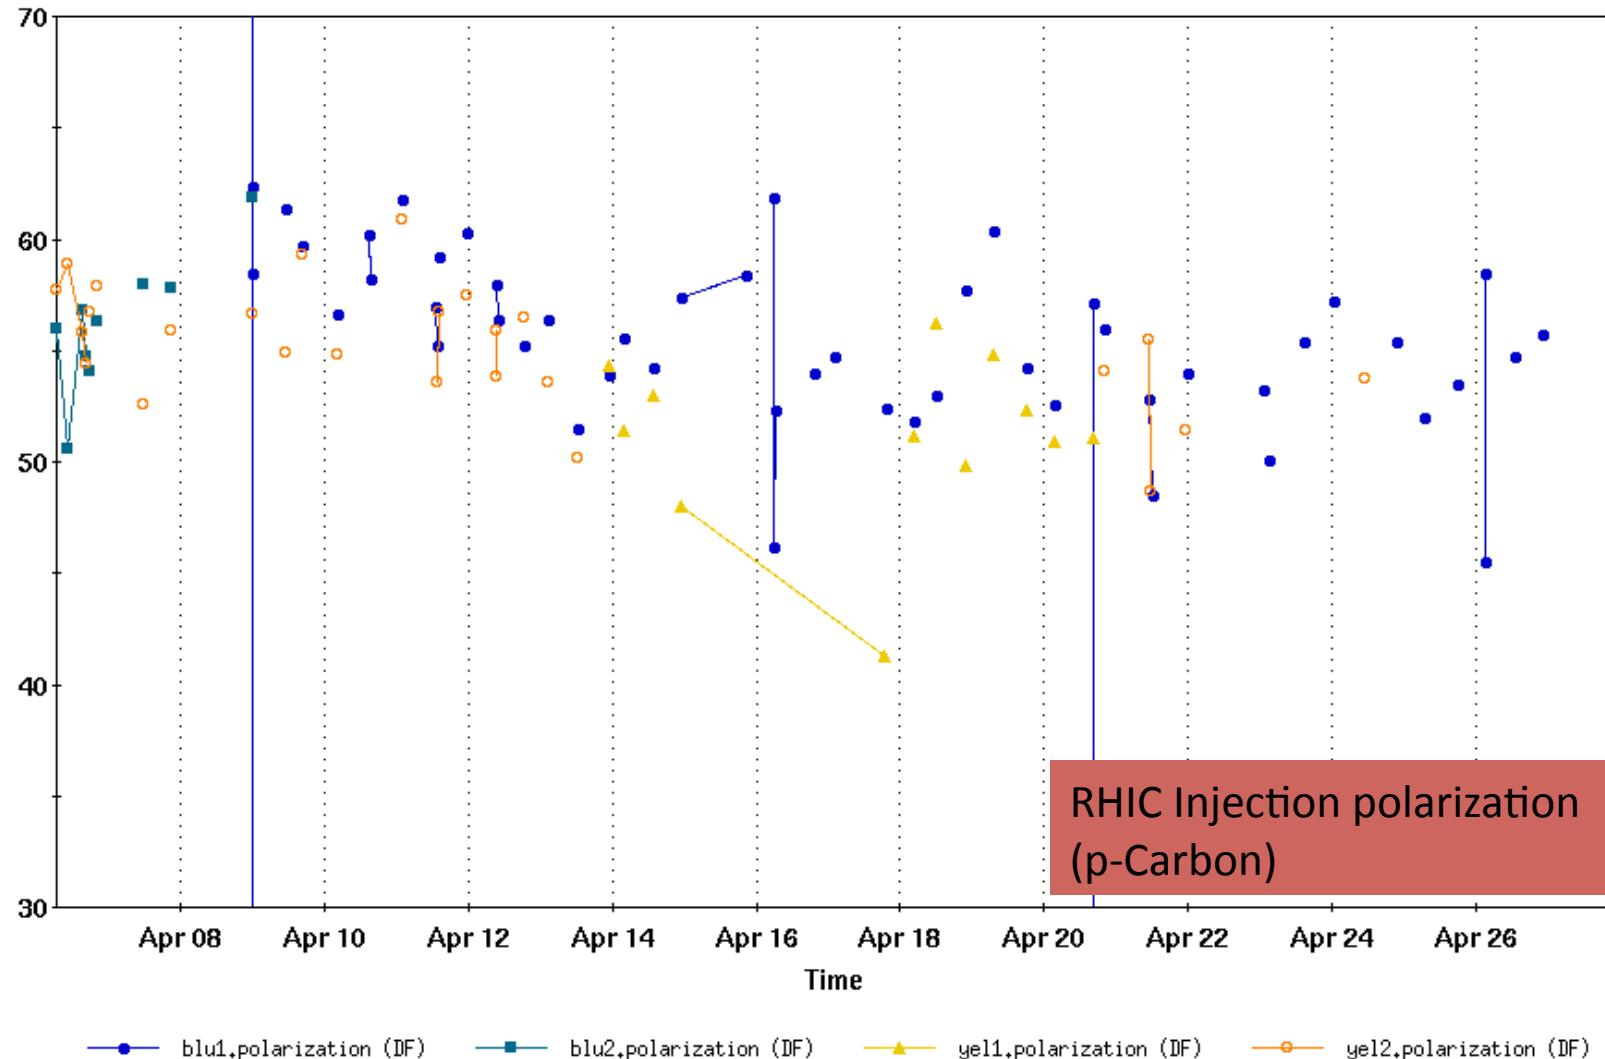

Figure 1

File Window Markers Analysis

A black and white engraving depicting a vast, swirling crowd of winged angels in a divine realm. The scene is filled with numerous angels, each with multiple wings, creating a dense, circular pattern that radiates towards a bright central light source. In the lower center, two figures stand on a rocky ledge, looking up at the celestial multitude. The entire scene is framed by a decorative border.

THANK YOU!
